FLEXi FX 1161

Design: Massimo Costaglia (IT)
Manufacturer: RIM CZ a. s.

FLEXi FX 1161

Stackable conference chair built on a cantilever frame with a separated seat and backrest structure.

Seat Upholstered with PUR foam (thickness 40 mm, bulk density 70 kg/m³) and coated with fabric. The front edge of the seat is rounded in order to avoid undesirable pressure on the legs of the seated person. Plastic cover on the bottom of the seat provides safe stacking with no damages to the upholstery. Sufficient width and ergonomic shape of the seat ensure correct and comfortable sitting position. Plastic parts made of polyamide.

Backrest Firm plastic frame, coated with self-supporting mesh. Provides an appropriate support in the lower back area and enables a sufficient range of backward tilting motion. The backrest has no sharp edges and together with an appropriate vertical curvature prevents from an unwanted pressure on the back of the seated person no matter the sitting position. Plastic parts are made of polyamide.

Upholstery Seat – to be selected from fabric or leather collection.

Backrest

- mesh K+R 482 black, material 100% polyester
 - mesh K+R, colours to be selected from the collection, material 97 % polyester, 2 % polyamide, 1 % elastane
 - mesh OMEGA, colours to be selected from the collection
 - mesh RIB, colours to be selected from the collection, 34 % polyester, 58 % polyamide, 8 % polyacrylics
 - mesh Tale, colours to be selected from the collection, 99 % PCR (post-consumer recycled polyester), 1 % polyester
-

Frame A wide cantilever frame made of a bent tubular profile \varnothing 25x2 mm. Surface treatment: black durable powder coating. Armrests are an integrated part of the chair, in harmony with its overall design, partially covered with black plastic (PP). Glides prevent from tipping, no sharp edges.

Plastic components Coloured, black. Colour stability guaranteed even in case of deep scratches.

Optional

- White plastic – backrest, seat, plastic armrest covers
- Chrome frame
- Plastic glides with felt pad

Certificate This product meets the European dimension and safety standards.
